

Getting to Know Rectangles

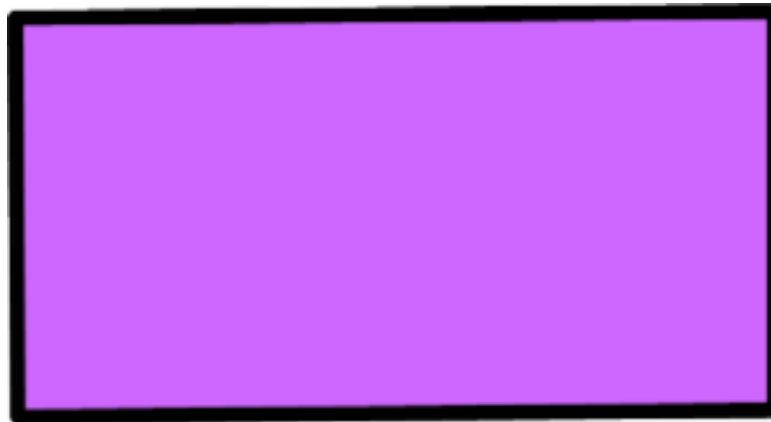

What shape is this? Can you draw a rectangle in the air?

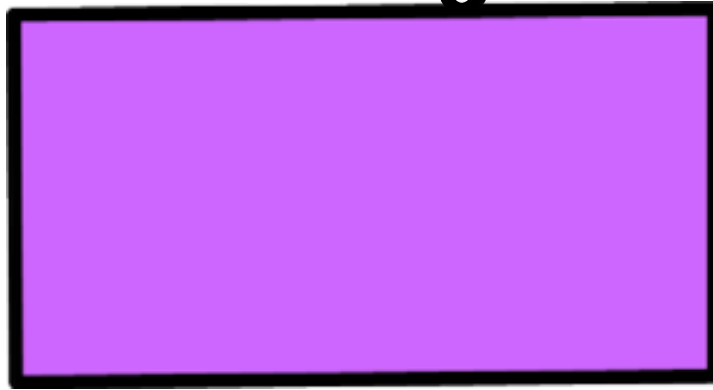

How many sides does it have?

Does a rectangle have curved/rounded lines or straight lines?

How many vertices, or corners, does it have?

Let's sing a song about Rectangles!

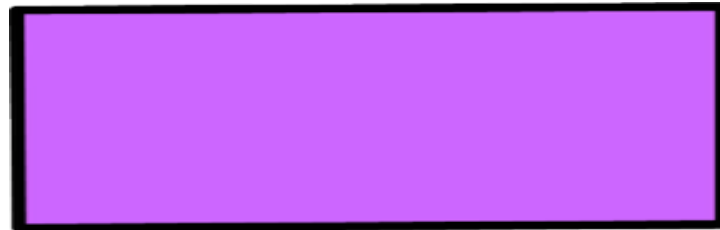

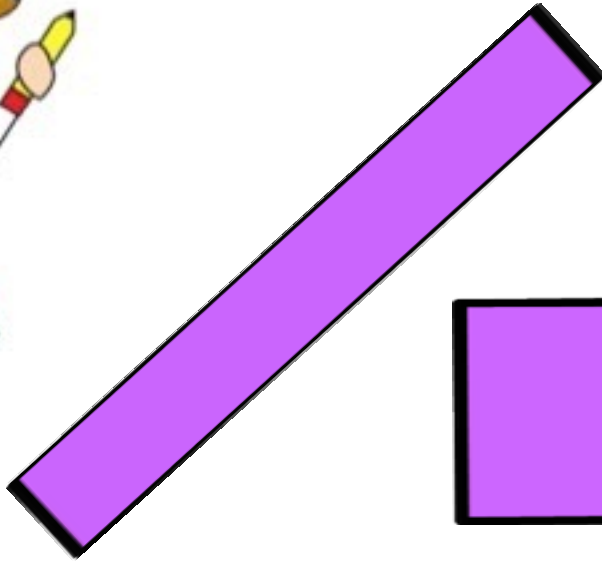

"That's A Rectangle," Songs About Shapes by StoryBots

Both of these shapes are rectangles.

How are they alike?

How are they different? Is it still a rectangle
if I rotate it?

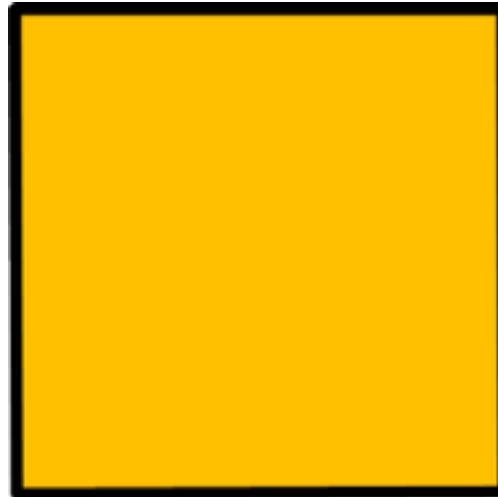

What do you notice about this shape?

How many sides? Are all the sides straight or curved?

Are they the same length?

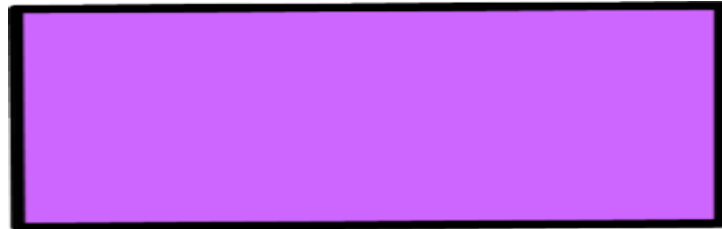

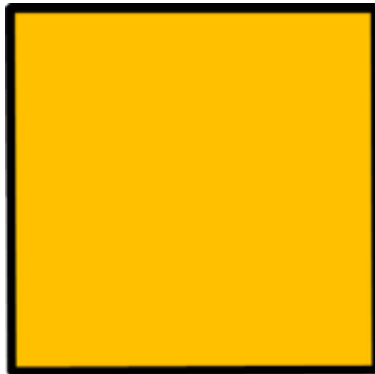

How many vertices or corners does it have?

What is the same about these two shapes?

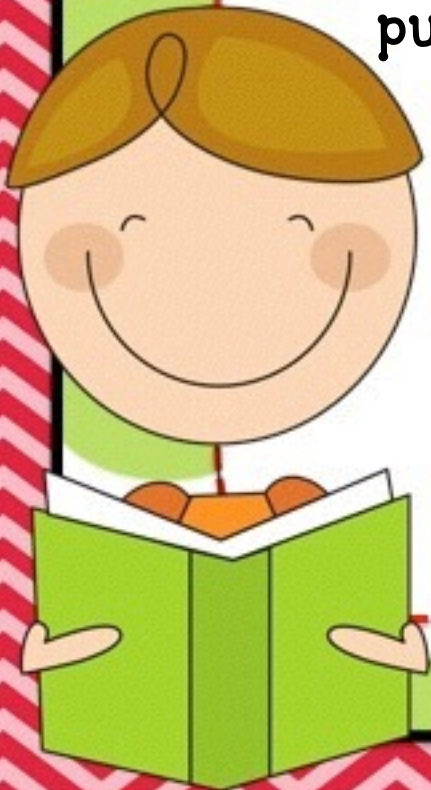

What is different?

A square is a special kind of rectangle.

Let's sort Rectangles!

- If I hold up a rectangle, put your thumbs up.
- If I do not hold up a rectangle, put your thumbs down.

**Let's find rectangles
around our
classroom!**
